

# Women's Studies Dept.

The undersigned strongly protest the February 10, 1975 "Meeting of the Whole" as a meeting which serves day students and working-at-home women and automatically excludes those women who basically hold several jobs -- out-of-home-work, housework, mothers, and students.

We are disappointed at the insensitivity of our sisters in holding this meeting during the day.

This is a continuation of the Administrative policies which have always systematically excluded SGS students from any significant input into the development of programs at Brooklyn College. This also further limits the benefits SGS students can receive from the institution of their education.
